How Does the OBi Work?

The OBi allows you to make and receive phone calls using your high-speed internet, your regular home phone and a VoIP provider like Google Voice™. **No computer is needed.** You can also call for **FREE** from one OBi to another OBi anywhere in the world. In this case, a traditional phone service is never needed to make the connections. Talking becomes truly free.

Requirements

1. Broadband Internet Connection
2. Internet Router with Available Ethernet Port
3. Analog/Digital Corded or Cordless Phone
4. VoIP Service Provider Account Username & Password.

Examples of Service Providers:

- Google Voice™
- Callcentric
